

St. Andrew's Society Archives

The Society Archives are currently in 2 large cabinets in a room adjacent to the Library. They contain boxes of documents that the Library has received and acquired over the last 7 years. Putting together an archive is a monumental task that will never be completed and will take a considerable amount of time organizing and documenting every piece of paper. The Library team has begun this process with sorting these documents into the following initial categories, more will be added as needed:

Genealogy
Highland Games
Maps
Programs
St. Andrew's Society

The Library team will begin looking at each document, identify the content, enter the information into an index and place into archive quality folders with an identification number and placed into the Archive Cabinets. Throughout this process the Library Team will digitize each document and make them available on the Society's Web Page.

The Library staff has already assisted members and the community with searching the Society's Archives for information.

Please let us know if there is something that you are looking for that we may be able to assist you in your research.

Thank you
The Library Staff
